

[Adjustable Art]

Abstract

A group of art panels, which can be arranged and rearranged to vary their overall image. This is accomplished by rotating the individual panels, see FIG. 1 and FIG. 2. A hanging device allows any side to be hung at the top, see FIG. 5. The designs of the individual panels are so designed to lend themselves to be versatile in relation to the other panels, when placed together and then rotated. These wall art panels are also versatile as to their overall dimensions, as they can be hung together to form a larger square as in FIG. 1 and FIG. 2, hung horizontally as in FIG. 3. or hung vertically as in FIG. 4. They can also be grouped in two's and have a pair on either side of a window, or piece furniture. They can also be separated, and placed throughout the room.
